

My family and I have had XM Sattelite Radio for the past year and have greatly benefited from its services. We have lived in a remote area in North Dakota and our XM Radio made it possible for us to have information that we would have otherwise not been able to have. I urge you to reject the NAB's petition 04-160. Limiting the services that XM radio provides, at any level, would be a disservice to many individuals who depend on Sattelite Radio for information and entertainment. Please support XM Sattelite Radio and their efforts continually provide excellent service.

Thank You,

Deborah Gettemy
